SUMMARY

Senior product designer with 10+ years across B2B, B2C, SaaS, healthcare, fintech, e-commerce and enterprise products. I take products from problem framing and research through interaction design, prototyping and delivery. Strengths: design systems, design leadership, close work with product and engineering, and AI-assisted design.

EXPERIENCE

Founder & Product Designer
Northline | Independent product | Oct 2026 – Present

- Defined and designed an automated crypto futures trading product, with a mobile app and real-time alerts.
- Wrote the product and technical spec, and designed every screen and safety rule, including risk limits that can block a trade but never change an open one.
- Directed the build with an AI coding agent, approving every design and deploy, with tests on every change.
- Took the product live with real money. A friends beta and a paid subscription are planned.

Senior Product Designer (L3)
CX100 | Bengaluru, India | Jan 2022 – Oct 2026

- Led product design end to end: problem framing, research, interaction design, prototyping, testing and delivery.
- Worked with product, engineering and business stakeholders to turn user and business needs into design.
- Ran UX research and usability tests, and built reusable patterns and components for consistency at scale.
- Used rapid prototyping and AI-assisted workflows to explore options and share ideas quickly.

Project: QNB Egypt: Digital Banking Redesign | Design Lead | about 18 months

- Led a team of four designers redesigning QNB Egypt’s mobile and internet banking apps.
- Built the design system from scratch: tokens and variables, typography, colour themes, components and patterns, for the Regular and Private segments in light and dark themes.
- Delivered approved high-fidelity designs, prototypes and documentation, and handed them off to engineering.
- Worked with client stakeholders on requirements, design reviews and decisions.

Project: Amazon: Variations Discovery | UX/UI Designer | client engagement Apr 2022 – Dec 2025

- Worked in a US and Europe team with shared design ownership, helping shoppers find other sizes and flavours from Search.
- Research showed about 50% of participants missed the existing variation message. Explored six directions; tested concepts reached 80%+ interaction with the intended area and a top clarity rating of 4.58/5.
- Proposed design directions and owned parts of the final design, which launched to production.

Product Designer (freelance, part-time)

Plum Tree Group | Remote | Oct 2019 – May 2022

- Designed future product concepts for healthcare and life-sciences enterprise clients, including Salesforce-based healthcare solutions.
- Created user flows, interaction designs, visual concepts and prototypes to explore ideas and align stakeholders.

UX/UI Designer

INKONIQ Design Agency | Bengaluru, India | Apr 2017 – Jan 2022

- Designed digital products for banking, healthcare, e-commerce and technology clients, including Infosys, HDFC Bank, Findmyhealth and Peritus AI.
- Worked across information architecture, UX strategy, interaction design, visual design and prototyping.
- Turned business requirements into design concepts and user flows with clients and cross-functional teams.

UI Designer

Capture Studio | Bengaluru, India | Jun 2016 – Apr 2017

- Designed brand identities and web and mobile interfaces, from first concept and user flows to visual design and delivery.

SKILLS

Product strategy: Product thinking, problem framing, UX strategy, requirements analysis, end-to-end product design

Research & validation: UX research, usability testing, concept validation, user flows, iterative design

Interaction design: Information architecture, interaction design, prototyping, high-fidelity UI, responsive design

Design systems: Design systems, reusable components, design tokens and variables, typography, light and dark themes

Leadership: Design reviews, stakeholder alignment, cross-functional collaboration, mentoring, design quality

AI tools: ChatGPT, Cursor, Figma AI, Figma Make, v0, Lovable, Adobe Firefly, Google Gemini, Relume, Perplexity

Other tools: Figma, Slack, Microsoft Teams, Notion

EDUCATION

MCA | National Institute of Technology Calicut (NITC) | 2013 – 2016

B.Sc. Computer Science | Don Bosco College of Arts & Science | 2009 – 2012

LANGUAGES

English (fluent), Tamil (native)
